Investment strategy

The Fund's primary investment objective is to achieve capital appreciation by investing in a diversified, yet concentrated portfolio of publicly listed life sciences companies (including biopharmaceutical-, specialist pharmaceutical-, medical device-, drug delivery-, vaccine- and diagnostic companies). The majority of the Fund's portfolio will consist of European companies listed on one of the (main) European stock exchanges, with a market capitalization of below € 1 billion at the time of investment. The Fund Manager believes that in particular this sub-segment of companies – generally referred to as the small- and midcap- segment – offers great potential for value growth.

Manager's comments

The global capital markets have continued their downward trend in the month of September. By selectively adding or increasing a small number of positions during the month, close to 80% of the Fund has been invested. The remaining 20% is held in cash at the end of the month. The large majority of the investments are in European companies (>80%) and most have market capitalizations below € 1 billion (>80%). The Fund has fully liquidated two of its holdings, taking a profit on both investments. The Fund will continue to carefully execute on its investment strategy going forward, leaving a comfortable cash position that allows to invest in opportunities that the Fund believes are currently fundamentally undervalued.

Portfolio breakdown

Important information
